

STEM - H.E.A.T. Academy

Healthcare, Engineering, Agri-Business, and Technology

The H.E.A.T. Stem Academy is a collaborative of local secondary schools, the Bloomington Area Career Center and local Business & Industries positioned to provide an innovative educational experience designed to foster growth among McLean County students and foster our communities and their economic growth.

What is the H.E.A.T. STEM Academy?

These authentic learning experiences for junior and seniors in high school focus on the areas of Health, Engineering, Agri-Business, and Technology.

The academy leverages the expertise of local business and industry content experts and existing framework of the Bloomington Area Career Center to provide a structure for this cooperative of innovation to thrive.

Building from the successes of the McLean County Medical Society-LeRoy Schools Cadaver Academy and learning opportunities in IT cyber security, the time is right to explore the next evolution of partnership between local business & industry, McLean County schools and Heartland Community College into a high school and college-bearing program.

"Too often, we give children answers to remember, rather than problems to solve." - Roger Lewin
